LETTRE DE RECOMMANDATION FREUDENBERG :

FREUDENBERG
INNOVATING TOGETHER

Internship Reference

Mr. Arsène Kuhlich born on 11 April 2005 was employed in our company from 17 June 2024 to 30 August 2024 in the Labs & Services department as a Intern.

Freudenberg Technology Innovation SE & Co. KG (FTI) belongs to the worldwide operating Freudenberg Group with almost 51,000 employees in some 60 countries. As a Corporate Function Freudenberg Technology Innovation SE & Co. KG identifies key technologies together with the Business Groups, performs state-of-the-art research and development, and thus strengthens the innovation power of the entire Freudenberg Group.

Mr. Kuhlich's area of activity essentially comprised the following tasks:

New Material Storage (Lean lift project)

- FTI invested in a new material storage system. Mr. Kuhlich created an overview from the existing material warehouse and transferred all the necessary elastomer raw materials to the new system. The Lean-Lift was programmed using the materials, work instructions were written, and the employees were trained to operate the machine using instructions and pictures by Mr. Kuhlich.

R/D Hydrogen & Fuel Cell Projects – Practical

- Mr. Kuhlich supported the engineers from materials development and process technology in a new R/D project. The challenge was to replace an existing PEFAS product with an alternative PEFAS-free hotmelt. Different types of hotmelt pellets were processed to generate sheets with defined, precise, and very thin dimensions. These were converted into samples and provided to the customer. The customer was able to evaluate the new materials in the existing production process.

MakerSpace / Toolshop

- The FTI is planning to open a MakerSpace this year. Mr. Kuhlich helped to realize this with a wide variety of projects. Starting with researching a business plan regarding cost structure, preparing all relevant HSE documents (work instructions, operating instructions, risk assessment) and setting up the hardware (such as 3D printers).
- Mr. Kuhlich has developed of his own machine vision project, to set up a test bench for live detecting impurities in the air (white rooms). The realization was carried out with an IDS NXT camera and green high intensity light. The prototype was implemented together with the tool shop and the machines used there (CNC machine). The IDS software to train the camera to detect dust. The project will be going on.

Research & Implementation of a new Planning Tools

- The idea at FTI is to introduce a standardized tool for project/production planning in the Labs & Services division. Mr. Kuhlich has looked at various software and tested and implemented the first prototypes (e.g. monday, bitrix24, factro)

FREUDENBERG
INNOVATING TOGETHER

In each stage of the internship, Mr. Kuhlich consistently acquired excellent specialist knowledge in an impressively short time and was always able to incorporate and implement it very successfully in his daily work. His excellent ability to familiarise himself rapidly must be mentioned in particular; it enabled him to grasp even difficult issues with impressive speed, which was the basis of his very successful training. Mr. Kuhlich always worked with a high level of initiative and completely identified with his tasks and our company at all times. We would like to specifically highlight his great commitment. Mr. Kuhlich had an excellent willingness to learn at all times. His absolutely reliable, thoughtful and diligent work ethic could be relied on at all times and even in the most difficult situations.

His way of working was consistently excellent and especially characterised by an extraordinary sense of responsibility. Mr. Kuhlich continuously impressed us with his extraordinary reliability.

From the very beginning of the internship, he always achieved very good work results. Mr. Kuhlich was an exceptional intern in every respect, and we were always extremely satisfied with his work.

He was highly appreciated and enjoyed great popularity because of his consistently very friendly, sociable and balanced disposition. His behaviour towards the management, instructors, colleagues and customers was always exemplary in every respect.

The collaboration with Mr. Kuhlich was very pleasant and gratifying. We believe he is very well-suited for his chosen profession. We would like to thank him for his consistently very good performance and wish him continued success and all the best both for his future career and private life.
